ACCESSORIES & ENERGY SOLUTIONS
FOR CAR AND LEISURE

In this catalogue you will find an overview of the assortment from Pro-User Electronics. These products are manufactured for Pro-User Electronics by reliable manufacturers from all over the world. All products contain the right quality approvals such as: CE, E, R&TTE, GS and TÜV. With high-quality products and its unique design Pro-User Electronics has proven to be a strong brand in multiple countries.

Pro-User Electronics is part of Tradekar House of Leisure Brands

IBC series

The absolute best when it comes to charging battery's. With our wide range of battery chargers there is always a battery charger that will suit your needs. Our multi-voltage IBC chargers ensure that you will never come across any unpleasant surprises ever again. These chargers are compatible with a wide selection of batteries and have a minimum of 7 up to a maximum of 10 step charging program. This program ensures that your battery remains in optimal condition and thanks to the display you are always able to check the current status of the charging program.

These chargers are installed with a Bluetooth systeem that let's you connect them to your mobile phone and check the battery status through use of our Pro-User Check & Charge app. While using this app you will not only be able to read the status, but you may also switch the charging program on and off.

Battery charger with display
- Suitable for 6V / 12V and 12V / 24V STD, GEL and Lithium batteries
- Bluetooth for Check & Charge app* except IBC4000 & IBC800
- Fully protected against sparks, shortcut and overheating
- Supplied with recovery function
- Waterproof casing. Up to 65 IP
- Digital control with a built-in microprocessor
- Including battery pole clamps and eyelet terminals

IBT1

Do you always want to be up to date regarding the status of your battery? Our IBT1 in combination with an IBC series charger (while using a Bluetooth connection) will give you acces to all the information on your phone through our Pro-User Check & Charge app. You may download our Pro-User Check & Charge app from both the Apple and Google Play Store. If you discover that your battery needs to be charged, you can use one of our battery chargers to get it back to optimal condition.

DFC series

These battery chargers are ideal for charging 6V & 12V batteries in your vehicle. The built in intelligent electronic checks the condition of the battery and always charges with the correct charging current.
When the battery is charged, the battery charger switches to a trickle charge mode. With 3 different types of battery chargers, there is always a suitable battery charger for your application.

Intelligent battery chargers
- With protection against sparks, short-circuiting and overheating
- Digital control with a built-in 12-bit AD microprocessor
- Visual and acoustic warnings indicator
- With automatic switch to maintenance mode
- Incl. battery pole clamps and eyelet terminals
- Compact design, suitable for permanent mounting

MCH series

Pro-User automatic battery chargers with quick charge function. These battery chargers are suitable for charging 12V batteries in your vehicles and are installed with an automated charging process. Once the battery is fully charged the program does not switch off completely, but instead continues to charge using a small charging current to protect the battery against self-discharge. These simple battery chargers, equipped with a convenient handle, ensures that you will be back on the road in no time.

Intelligent Battery Chargers
- With protection against sparks, short-circuiting and overheating
- LED display with current charging voltage and charging current report
- With automatic switch to maintenance mode

PSI series - Pure Sine Wave Inverters

The inverter is ideal if you want to use sensitive 230V equipment during your trip by car, camper, boat, etc. Think of charging your phone or laptop, but also when you want to use an electric cool box, this inverter is a godsend. The PSI3000TX Hybrid inverter can handle an extra high peak output power and is equipped with a built-in MPPT solar panel charge controller. This way you get the highest possible efficiency from your solar panels.

In addition, this voltage inverter is equipped with an autoswitch, so that in the event of a power failure, the inverter automatically switches to the innverter and also switches it off as soon as mains voltage is available again.

PSI3000TX Hybrid with built-in MPPT solar panel charge controller and battery charger

- With built-in MPPT solar panel charge current controller
- Pure sine wave voltage, suitable for very sensitive devices
- Ideal for mobile use to use 230V devices
- Protects against over and under voltage, sparking, short circuit and overheating
- The inverter generates an AC 230 voltage from a 12V DC voltage
- Easy mounting. Included remote control for easy use
- With built-in fan
- Auto switch to mains as soon as it is turned on or connected to utility power
- Built-in battery charger suitable for STD / AGM / LiFePO4

Name	PSI3000TX Hybrid
Art.no.	19134
Battery Voltage	10.5V – 16V
Standby Current	≤1.2A
Recommended Battery Capacity	Lead acid/Gel/AGM: ≥480 Ah
AC Output Voltage	230V
Frequency	50 Hz
Automatic Transfer Switch	✓
Rated Output Power	3000W
Surge Power	4500W (10s)
Peak Power	6000W (2s)
Efficiency	≥90%
USB Output	5V / 2.1A
Dimensions	L415 x W220 x H150 mm (housing) L515 x W220 x H150 mm (incl. terminals)
Weight	8.6 kg
Operating Temperature	-15°C – 40°C

EAN	8717809191342

PSI3000TX Hybrid

The PSI inverters ensure that the 12V voltage from your battery is converted into a 230V tension as you are used to at home. Because these inverters have a pure sine wave voltage, you can use them even for the most sensitive equipment. In addition, our PSI1000TX, PSI1500TX, PSI2000TX & PSI3000TX are equipped with an autoswitch, so that in the event of a power failure, the inverter automatically switches to the inverter and also switches it off again as soon as mains voltage is available again.

PSI3000TX

INV Series - Modified Inverters

These inverters with a modified sine wave are the economical alternative to pure sine wave inverters. A modified inverter supplies 230V which is very useful when there is no main voltage available and you would like to connect household appliances during the trip. This inverter converts the 12V coming from your car battery into 230V. However, you cannot connect all types of devices to this type of inverter. The voltage from a modified sine wave inverter can be compared with unfiltered water. You can take a shower or wash your clothes, but this water is not suitable for drinking. In other words. It is not suitable for real sensitive equipment.

DC-AC Power Inverters
- Ideal for mobile use to use 230V devices
- With protection against over and under voltage, sparking, short circuit and overheating
- The inverter generates, from a 12V battery, an AC voltage of 230V
- With built-in cooling fan

Foldable Solar Panel

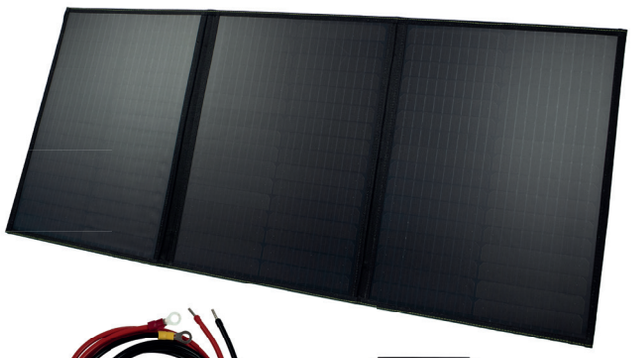
This foldable solar panel is the perfect solution for f.e. camping in the wild, spending a day on the water or in the woods; places where you have no electricity but where the solar panel can generate electricity for you.

This 100-watt solar panel features fold-out stands so you can easily move it for maximum sunlight.

The technique used in the solar panel is the Shingle Cell Technique where each cell rests on the previous cell. It is possible to connect several panels to each other so that enough sunlight is collected to generate the most optimal amount of electricity. That way you are not dependent on the mains electricity. In order to charge your on-board battery.

The foldable solar panel is equipped with a charge current controller of 10 Amper PWM technology. This allows you to easily connect a battery to the solar panel and charge it with the included connection material.

Naam	FOLDABLE SOLAR PANEL
Art.no.	28106
Max. Output	105 Watt
Max. Power Voltage	18V
Max. Peak Voltage (Vmp)	5.56A
Open Circuit Voltage	22.32V
Short-Circuit Current	5.89A
Solar Cell Efficiency	22.4 %
Max. USB-A Output	5V / 3.4A
Max. USB-C Output	5V / 3A
Max. DC - Output	23.6V / 4.5A
Output Type	MC4
Solar Panel	Mono Shingled, Epoxy
Dimensions Folded	L420 x W550 x H45 mm
Dimensions Unfolded	L1290 x W550 x H40 mm
Crocodile Clamp	2
DC-cable	1
Carabiner Hook	4
Weight	3.5 kg
EAN	8717809281067



Charge Current Regulator

A charge controller is needed to connect a solar panel to a battery. This regulator charges a battery as efficiently as possible and protects it from fluctuating charge currents and deep discharge. The SCM30 also features MPPT technology. This technology allows a charge controller to get even more power from a solar inverter. It determines the optimum operating point so that maximum power can be achieved and then converts it to a lower battery voltage.

Power Supply

This portable Power Station allows you to have access to power anywhere. Think about charging your phone, turning on an electric fan or a light. Ideal for outdoor activities! The PS1 is easy to use and features a display where you can read the battery status and wattage can be read.

The Power Station comes with a handy storage bag so you can take it anywhere without any problems and store it when you get home.

Name	PS1
Art.no.	20180
Battery Capacity	67.500 mAh / 243 Wh
5V USB-A Input	2x 3.0 Amp
5V USB-A Output	1x 4.8 Amp
USB-C In/Output	1
DC Input	15V / 4A 60W
DC Output	12V / 10A 120W
AC Output	230V / 50Hz
Charging via 12V connection	✓
LED Lamp	✓
Dimensions	L188 x W130 x H130 mm
Weight	ca. 2 kg
EAN	8717809201805

DRC Series

We have various models of wireless cameras available that are suitable for many applications. You can e.g. mount them on a truck, trailer, van, passenger car, caravan or camper. Technical malfunctions are kept to a minimum, because we only supply digital systems. A wireless reversing camera is very easy to install compared to a wired one.

Digital Wireless Camera Systems
- Ideal for car, truck, camper, caravan or trailer
- Weatherproof camera with 6 IR LEDs for improved night vision
- Automatic activation when reversing
- LCD display with distance indicator
- Extra long antenna for long distance signal transfer (DRC5040)

Jumper Cables

Jumper cables are the solution if the car no longer wants to start due to a flat battery. Suitable for use with 12 and 24 volt batteries. The jumper cables are available in different wire diameters and suitable for both diesel and petrol engines.

Jumper Cables
- Easy to handle due to high flexibility and low weight
- With isolated clamps
- Incl. useful storage bag
- Available in different types and diameters

Name	Jumper cables 35 mm2	Jumper cables 25 mm2
Art.no.	42356	42354
Voltage	12V / 24V	12V / 24V
Usage	Petrol engine up to 7.000 cm³ Diesel engine up to 4.000 cm³	Petrol engine up to 5.500 cm³ Diesel engine up to 3.000 cm³

Battery Tester

Do you always want to be up to date regarding the status of your battery? The BT400 makes this possible by plugging it into the 12V connector in your battery.

Digital Battery Tester BT400
- Digital direct in-car battery tester with LCD display
- With 12V connection
- Checks the battery charge status
- LCD display and LEDs for essential battery information
- Incl. USB output (5V / max. 1 A)

Name	BT400
Art.no.	18108
Voltage	12V
EAN	8717809181084

Portable Compressor Coolers

Always a cold drink at hand or would you like to keep your food cold during the trip or camping? It's all possible with the Pro-User coolers. The portable coolers from Pro-User Electronics have a capacity of 30 & 38 liters and have a modern and compact design. The boxes are light and can therefore easily be taken anywhere. The CB45 is equipped with an extendable handle and wheels, making it even easier to carry.

The powerful compressor allows the cool boxes to cool down to -20° C at an ambient temperature of up to 52° C, when connected to the mains.

The CB35 has a removable divider so you can choose one large cooling compartment or a cooling and freezer compartment. With the CB45, you can set the temperature of the compartments separately from each other. So you can refrigerate and freeze at the same time!

Optionally, a 10 Ampere Lithium battery is available for the CB45. The battery ensures that you can cool for up to 8 hours and freeze for up to 4 hours without being connected to the mains.

Portable Compressor Coolers
- Works on both mains voltage and 12V batteries
- Compressor technology for optimal cooling performance
- Cooling and freezing in one box
- No food smells due to solid closure

Cooler CB35

PRO-USER ELECTRONICS IS PART OF TRADEKAR HOUSE OF LEISURE BRANDS. THESE ARE OUR OTHER BRANDS:

Spinder
In 2013, Spinder was acquired by Tradekar. Several new models of bike carriers were introduced under the Spinder brand. In 2022, the brand received a complete makeover. Including new logo and new product range.
Visit the website for more information:
www.spinder.com

Enduro Technology
We started with the development of a caravan manoeuvring system at the end of 2005, which was introduced to the market in the year 2007. Manoeuvring systems were only available to a select group of caravan-owners at that time. Partly because of Enduro Technology, the market has opened and a manoeuvring system has become almost common property to the caravan-owner!

www.enduro-europe.eu

ETM-TEC
The ETM-TEC electric outboard motors from fluistermotor.nl are part of Tradekar Benelux BV since 2018. These trolling motors are perfect for a sailing say. Because the motor of ETM-TEC are electric there is no emission and they are therefor very environmentally friendly. ETM-TEC has different types of engines and accessories in its product range.
Visit the website for more information:
www.fluistermotor.nl

Pro-User bike carriers
Pro-User bike carriers develops and manufactures solid and reliable bike carriers for the transportation of bicycles on the tow bar, back or roof of the car. All bike carriers are own developments. We also have European patents on multiple (sub-) products. All our products are produced with great care and undergo multiple quality checks. Most of our products carry a European type approval granted by the RDW.
Visit the website for more information:
www.pro-user.eu

Cover It
In 2014 Tradekar took over the brand Cover It. Cover It offers protection covers for dust and scratch free storage of a roofbox or roofbars. The protection covers are made of strong, waterproof and UV resistant double layer PVC fabric. For extra protection, the inner side has a rubbercoating and the protection covers can be closed precisely by a zipper and Velcro.
Visit the website for more information:
www.cover-it-all.eu

SimPark
SimPark has been part of Tradekar House of Leisure Brands since 2021. SimPark is known for the strong maneuvering systems that are ideal for heavier caravans, tandem axles or trailers.
